Education

Vaageswari College Of Engineering

June 2024

Bachelor of Technology in Computer Science (AI & ML) (CGPA: 7.9/ 10.0)

Karimnagar, Telangana

- **Relevant Coursework:** Data Structures and Algorithms, Artificial Intelligence & Machine Learning, Prob & Stat in CS (Python), NLP, Database

Professional Experience

Unycloud Technologies

Mar 2025 – present

Associate Software Developer

Nanakramguda, Hyderabad

- Worked as a Frontend on enterprise web applications using React.js and JavaScript, contributing to scalable and high-performance user interfaces.
- Built reusable and global UI components reused across multiple modules, reducing development time and improving maintainability.
- Integrated frontend components with backend REST APIs and SQL-based systems, ensuring accurate data handling and smooth user interactions.
- Collaborated with backend, QA, and product teams in an Agile environment to deliver features with high quality and minimal defects.
- Handled bug fixes, performance optimizations, and production feature enhancements, improving overall application reliability and user experience.

Projects

RIOO Base Application – Project Management System | React.js, JavaScript, SQL, REST APIs, HTML, CSS

- Developed a scalable, enterprise-grade web application using React.js and JavaScript that enables users to search, filter, and explore properties, apartments, and amenities with an improved user experience.
- Designed and implemented a modular, reusable component architecture across 10+ screens and modules, reducing code duplication by 30–40% and improving developer productivity by 25%.
- Integrated frontend components with backend RESTful APIs and SQL-based systems, ensuring efficient data retrieval, accurate data mapping, and seamless system communication.
- Optimized component rendering, API consumption, and frontend performance, resolving UI defects and enhancing application responsiveness for production environments.
- Collaborated with backend developers, QA engineers, and product teams in an Agile environment to deliver high-quality, production-ready features within defined timelines.

Kenzo – Employee & Project Management Portal | React.js, Node.js, Express.js, SQL, Supabase, Bootstrap, HTML

- Designed and developed a full-stack, enterprise-grade HR and Project Management portal enabling employees to manage tasks, track time, monitor projects, and access HR services.
- Implemented secure Role-Based Access Control (RBAC) to restrict HR and Admin modules, ensuring data privacy and authorized access across employee, project, and reporting workflows.
- Built modular, responsive frontend components using React.js and Bootstrap, improving usability, maintainability, and cross-device compatibility.
- Developed and integrated secure backend RESTful APIs using Node.js and Express.js with SQL and Supabase for efficient data management and system scalability.
- Optimized application performance, resolved production bugs, and collaborated with cross-functional teams in an Agile environment to deliver a scalable, production-ready enterprise solution.

Technical Skills

Programming Languages: Python, JavaScript, HTML, CSS

Frameworks & Libraries: React.js, Node.js, Express.js, Ant Design (AntD), Material UI (MUI)

Web Technologies: RESTful APIs, Responsive Web Design, Frontend–Backend Integration

Databases: MySQL (Relational Database Management System), MongoDB

Developer Tools: Git, GitHub, Visual Studio Code

Cloud & Platforms: Basic knowledge of Cloud Computing, AWS

Areas of Interest: Web Design and Development, Artificial Intelligence, Machine Learning
